

Smart Education Management for Modern Institutions

One connected platform to run your entire school or college —
from admission to marksheet, fees to communication —
designed around the Nepali Bikram Sambat calendar.

Native Bikram Sambat Calendar

Built-in AI Assistant

11 Role-Based Portals

All Features Included

80+

BS+AD

DUAL CALENDAR

Running an institution on paper costs you **time, accuracy and trust**

Most institutions still depend on dozens of registers, scattered spreadsheets and informal chat groups. The hidden cost is enormous — in staff hours, in mistakes, and in the confidence of the families you serve. Every hour spent on registers and receipts is an hour not spent teaching, planning and growing. [ShikZya](#) is built to give those hours back.

Hours lost to manual work

Attendance registers, hand-written fee receipts, marks copied from book to book — your team spends more energy on paperwork than on the students it should serve.

Information scattered everywhere

Student records in one place, fees in another, exam marks in a third. Finding a single detail means digging through stacks of files and folders.

Parents kept at a distance

Families usually hear about attendance, fees or concerns only once they have become a problem. There is no simple, daily window into a child's progress.

Costly, avoidable mistakes

A mistyped fee, a miscalculated marksheet, a date in the wrong calendar — small errors quietly erode the trust families place in your institution.

Meet **ShikZya** — your whole institution in one place

ShikZya is a complete, cloud-based Education Management System that runs your entire institution from a single platform. From the moment a student is admitted to the day they download their marksheet — attendance, fees, exams, results, communication, library, transport and more — everything lives in one connected system. Your team simply logs in at **ShikZya.com**, and every record stays accurate, instant and secure. Best of all, **ShikZya** speaks your calendar natively in **Bikram Sambat** alongside AD.

BUILT FOR THE WAY YOUR INSTITUTION ACTUALLY WORKS

One platform for schools and colleges alike — from early grades to Master's programs

Whether you run a K-12 school or a college offering programs like BBA, MBA, BSc and MSc, **ShikZya** adapts to your structure, your fee patterns and your grading. You don't change how you work — the platform fits around you, and grows with you.

Admission to Alumni

Attendance to Marksheets

Fees to Receipts

Parents to Principal

100% Cloud

No servers and no installation. Access everything securely from anywhere, at any time.

Secure by Design

Your data is encrypted, isolated per institution, and protected at every layer of the system.

All Features, Now

Every plan tier is unlocked during our introductory period — explore the full platform from day one.

What your institution gains from day one

ShikZya is not about adding more software to your day. It is about reclaiming time, removing mistakes, and bringing families closer to their children's education.

Save hours every single day

Mark attendance in seconds, generate fee receipts automatically, and calculate marksheets instantly. Your staff spend their time on students instead of stationery.

Go fully paper-free

Digital records, digital receipts, digital ID cards and certificates. Less printing, less storage, and nothing lost, damaged or misfiled ever again.

Bring parents truly closer

Parents follow attendance, marks, fees and notices from their own phone, download marksheets, and raise concerns directly to teachers and the principal.

Accuracy you can rely on

Marks, GPA, grades and fee totals are all calculated by the system. Manual addition errors on marksheets and receipts simply disappear.

Everything in Nepali dates

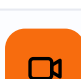

Holidays, exams, fee due dates and every calendar event display in Bikram Sambat, exactly the way your institution plans its academic year.

Decisions backed by real data

See attendance trends, fee collection and exam performance at a glance, so you can lead with clear numbers instead of guesswork.

Everything your institution runs on, in one place

More than 80 modules, organised into everyday areas so any member of staff finds exactly what they need without training overhead.

|  Homework Class-wise homework assignments |  StaffConnect Internal staff chat & messaging |
|  Library Books catalog, issue & return | |

A guided, live demonstration using your own institution's sample data can be arranged on request.

What makes us genuinely different

These are not small extras. They are the capabilities that set **ShikZya** apart from every generic school software in the market.

1

Native Nepali Bikram Sambat Calendar

Most school software understands only the English (AD) calendar. **ShikZya** is built around Bikram Sambat from the ground up, covering years 2000 to 2090, with automatic conversion between BS and AD. Your institution adds its own full monthly and yearly calendar — events, holidays and exam dates — and parents and students see it live in their own portals, so the whole community stays perfectly in sync with no confusion.

OUR BIGGEST COMPETITIVE ADVANTAGE

2

Instant Notifications — including urgent alerts

The principal can post a notice at any moment and choose who sees it — staff, families, or everyone. Mark it urgent and it flashes directly across every relevant portal the instant it is sent, so an emergency closure, a sudden schedule change or an important reminder reaches everyone immediately — no phone calls, no missed messages.

NOTHING IMPORTANT GETS MISSED

3

ConnectSchool — real concern resolution, not just chat

When a parent raises a concern, it follows a clear, accountable path: Parent → Teacher → Principal. Messages are sorted into concerns, notices and general topics, each tracked through its status as it is sent, read and replied to. Nothing slips through the cracks, and every family feels genuinely heard.

BUILDS LASTING PARENT TRUST

4

One-Click Student Import — zero migration hassle

Moving to a new system should never mean re-typing your entire student roll. With **ShikZya**, your existing student data imports in a single click through the Data Operator portal. No tedious manual entry, no lost records — your institution is up and running with its real data almost immediately.

EFFORTLESS ONBOARDING

More reasons institutions choose us

Ready-made LearnHub content: curated learning videos and quizzes are provided centrally and organised by category, so your students gain quality digital learning material without your staff having to create it from scratch.

5

Built-in AI Assistant

A friendly AI chatbot lives inside the parent portal. Families tap the floating button and ask a question in plain language, receiving instant help without ever needing to call the office. It is a native intelligence layer most school platforms simply do not offer.

SMART, ALWAYS-ON SUPPORT

6

StaffConnect — a dedicated space for your team

Your teachers and staff get a private internal chat with direct messages and group conversations. All coordination happens inside [ShikZya](#), keeping official institutional communication cleanly separated from personal messaging apps.

BETTER INTERNAL TEAMWORK

7

One platform for school and college

K-12 grades and college programs such as BBA and MBA run side by side on the same platform. Different fee structures and grading patterns are handled gracefully, so you can serve multiple segments without juggling multiple systems.

GROW WITHOUT SWITCHING TOOLS

8

11 dedicated portals — one for every role

Where typical software offers three or four logins, [ShikZya](#) provides eleven: Principal, Teacher, Parent, Student, Accountant, Reception, Data Operator, Librarian, Transport Officer, Canteen Staff and the platform Superadmin. Everyone sees exactly the tools their role requires, and nothing more.

THE RIGHT ACCESS FOR EVERYONE

Intelligence built into **everyday academic life**

Most school software simply stores your information. **ShikZya** goes further — it understands it. A genuine, human-like AI runs across the platform: a personal right hand for the principal, and a smart assistant in every parent and student portal that truly understands each child.

NOT A SCRIPTED BOT — A REAL, HUMAN-LIKE ASSISTANT

A genuine AI partner for your institution, not canned replies

Across **ShikZya** the AI talks like a person, understands plain language and actually gets things done — acting as the principal's right hand and as a personal guide for every parent and student.

AI The Principal's AI — your personal right hand

Inside the principal's portal sits an AI that works like a real personal assistant — not a scripted, canned-reply bot, but a genuinely conversational, human-like intelligence. Ask it anything in plain language — "show me Class 9's attendance this week", "which fees are still pending", "draft a holiday notice for parents" — and it understands, pulls the answer from across the whole platform, and gets it done in seconds. It is the principal's right hand, always on duty.

THE PRINCIPAL'S PERSONAL ASSISTANT

AI AI in the Parent & Student Portal

The parent and student portals carry their own AI that doesn't just answer questions — it actively analyses every detail of the student. Attendance patterns, marks and GPA trends, fee status, homework and more are all studied, so a parent or student gets a clear, personalised answer and gentle insight into how the child is really progressing — available any time, day or night.

UNDERSTANDS EVERY STUDENT

AI AI-Powered Reports & Insights

Beyond conversations, the same intelligence reads your institution's data and turns it into clear direction — which classes need attention, where fee collection is slipping, and how results are trending — so leadership decides with insight, not guesswork.

SMARTER DECISIONS, FASTER

Awareness-building video learning for every student

LearnHub gives students below Class 12 a growing library of short, age-appropriate videos and quizzes — organised by topic — that build real-world awareness on the things that matter most. Quality content is provided and curated centrally, so your staff never have to create it from scratch.

Categories shown reflect the live LearnHub library; new topics and videos are added centrally over time at no extra effort for your institution.

A perfect fit for every role

Each person logs in at ShikZya.com and sees a portal designed just for them — focused, uncluttered and immediately familiar.

Principal & Owner

A bird's-eye dashboard of the entire institution — attendance, fees, performance and staff — with AI support and a direct line to every parent concern.

Teacher

Mark attendance, enter exam marks, manage classes and subjects, set homework and respond to parent concerns — all from a single screen.

Parent

Follow your child's attendance, marks and fees, download marksheets, pay online and raise concerns directly. Ask the built-in AI assistant anything.

Student

Check timetable, attendance and results, download marksheets, and learn from LearnHub videos and quizzes whenever it suits.

Accountant

Collect fees, generate receipts, manage salaries and transport fees, and keep clean, auditable financial records throughout the year.

Data Operator & Front Office

Reception, Data Operator, Librarian, Transport Officer and Canteen Staff each receive a tailored portal — including one-click student import for fast setup.

Marksheet download is available directly inside the Parent and Student portals, so families receive official results instantly — without a single visit to the office.

Four plans that grow with you

ShikZya is organised into four clear plan tiers, so your institution can choose the right depth of features. During our introductory period, every institution enjoys the complete platform.

 **Introductory offer:** for a limited time, every institution receives access to all features across all four tiers — so you can experience the complete ShikZya platform from your very first day.

Your institution's data, safe and private

Your institution's data is sensitive — student records, family details, finances and results. **ShikZya** is engineered to protect all of it, so you can adopt the platform with complete confidence.

Each institution kept separate

Your data lives in its own secure space. No other institution can ever see, reach or access your records — strict isolation is built into the platform's foundation.

Protected logins

Every password is stored in encrypted, irreversible form, and each login is freshly secured. Only the right person reaches the right portal.

Role-based access

A teacher sees teaching tools, an accountant sees finance, a parent sees only their child. Everyone is limited to exactly what their role allows.

Safe uploads

Photos and documents are checked for type and size before they are accepted, keeping unwanted or harmful files out of your system.

Yours, and yours alone — no one else can see it

Everything your institution stores in **ShikZya** stays completely private to you. Your data is never sold, never shared, and never visible to anyone outside your institution — not even the **ShikZya** team. It always remains fully under your control.

PRIVACY YOU CAN STAND BEHIND

Built to safeguard the families who trust you

From encrypted credentials to strict separation between institutions and carefully controlled access, **ShikZya** treats the protection of your students' and families' information as a first principle — not an afterthought. Full technical detail is available in our separate Technical Whitepaper.

A platform that keeps getting better

ShikZya is always growing. These are the features on the way — so when you join, you're choosing a platform that keeps adding value to your institution at no extra effort on your part.

- Online Payment Gateway** COMING SOON
Pay fees online with support for most major banks, plus popular digital wallets — eSewa, Khalti and IME Pay — so families can settle dues instantly and receipts reconcile automatically.
- ShikZya Mobile App** COMING SOON
A dedicated mobile app launching from the **ShikZya** platform for parents, students and staff.
- Educational Games — Math & Science** COMING SOON
In-app mathematical and science games built right into the platform, turning practice into play — so younger students sharpen core skills and build genuine interest and curiosity in their studies.
- eBooks — Chapter-wise Class Books** COMING SOON
A built-in eBook library so students can read their own class textbooks right inside the app — browsing chapter by chapter, anytime and on any device, with no extra books to carry.
- Student Behaviour Analytics** COMING SOON
For students below Class 10, teachers log a quick daily behaviour note — helpful, participative, talkative, calm, focused or restless — and **ShikZya**'s AI turns it into a clear monthly behaviour graph, so parents and the school can spot patterns early and support each child where it matters.
- Where is my Child — Live Location** PLANNED
Parents can see their child's real-time location directly inside the parent app, for added safety and peace of mind. Planned for students in Class 8 and below.
- Smart Trackable ID Card — Child Safety** PLANNED
An optional smart ID card with a tiny built-in location tag — much like a personal tracker — so parents can see their child's last-known location right inside the app: at the school gate, on the bus or on the way home. A quiet, extra layer of safety with no phone needed in a young child's hands — fully optional and switched on only with each family's consent.
- GPS-based Real-Time Transport** PLANNED
Live bus tracking with GPS so parents and the transport officer see vehicle location and estimated arrival times in real time.
- Punching-Card Attendance & Staff** COMING SOON
Card-based punch-in/out for student and staff attendance, integrated with the attendance module.
- Punching-Card Canteen** PLANNED
Cashless canteen transactions through the same punching-card system.
- Homework Submission** PLANNED
Students submit homework digitally; teachers review and grade within the portal.
- Online Classes** COMING SOON
Live online classes built right into **ShikZya** — schedule and run classes natively, with no third-party conferencing tool required.
- Advanced Analytics & Multi-Language** PLANNED
Richer dashboards and a multi-language interface for wider accessibility.

✔ **You grow, we grow with you.** Every new feature arrives as part of the platform you already use — no migrations, no disruption, just more value over time.

Up and running in three simple steps

| | | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
